PTM: ADP-ribosylated (-auto).
SIMILARITY: Belongs to the PARP family.
SIMILARITY: Contains 15 ANK repeats.
SIMILARITY: Contains 1 sterile alpha motif (SAM) domain.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                nicotinamide + {ADP-D-ribosyl}{(N+1)-acceptor.
SUBNNIT: Oligomerizes and associates with YMKS2. Interacts with the cytoplasmic domain of LNPEP/Otase in SLC2A4/GLUT4-vesicles.
Binds to the N-terminus of telomeric TRF1 via the ANK repeats.
SUBCELLULAR LOCATION: Cytoplasmic, associated with the Golgi and with juxtanuclear SLC2A4/GLUT4-vesicles. A minor proportion is also found at nuclear pore complexes and around the pericentriolar matrix of mitotic centromeres. During interphase, a small fraction
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Event=Alternative
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    ALTERNATIVE PRODUCTS:

Determines the period length of circadian and ultradian rhythms; an increase in PER dosage leads to shortened circadian rhythms and a decrease leads to lengthened circadian rhythms. Essential for the circadian rhythmic component of the male courtship song that originates in the thoracic nervous system. The biological cycle depends on the rhythmic component of the male courtship song that originates in the thoracic nervous system. The biological cycle depends on the rhythmic formation and nuclear localization of the TIM-PER complex. Light induces the degradation of TIM, which promotes elimination of PER. Nuclear activity of the heterodimer coordinatively regulates PER and TIM transcription through a negative feedback loop. Behaves as a negative element in circadian transcriptional loop. Does not appear to bind DNA, suggesting indirect transcriptional inhibition (By similarity).

-i. SUBUNIT: Forms heterodimer with timeless (TIM); the complex then translocates into the nucleus (By similarity).

-i. SUBCILIUAR LOCATION: Nuclear at specific periods of the day.

-i. SUBCILIUAR LOCATION: Nuclear at specific periods of the day.

-i. SUBCILIUAR LOCATION: Nuclear at specific periods of the day.

-i. SUBCILIUAR LOCATION (By similarity).

-i. SUBCILIUAR LOCATION (By similarity).

-i. SUBCILIUAR LOCATION (By Similarity).

-i. PIM: PEROSPHORYLATED WITH A CIRCADIAN RHYTHMICITY, PROBABLY BY THE DOUBLE-TIME PROTEIN (DBT). PHOSPHORYLATION COULD BE IMPLICATED IN PER-TIM (BY SIMILARITY).
                                                                                                                                                                                                                                                                                                                                                                   This SWISS-PROT entry is copyright. MISCELLANEOUS: THE SEQUENCE SHOWN IS THAT OF STRAIN ATLIXCO.

MISCELLARITY: Contains 2 PAS (PER-ARNT-SIM) dimerization domains.

SIMILARITY: Contains 1 PAS-associated C-terminal (PAC) domain.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    FUNCTION: Essential for biolog
